MORE THAN MILLING.

For 75 years we have built a solid reputation as a supplier of high quality products that meet the specific needs of our extensive customer base. Whether these requirements are in the pharmaceutical, fine chemical, energy, or food industry, we offer complete solutions adaptable to the users' individual environments. At Frewitt, we are at the forefront in the development of dry and wet milling processes, as well as the manufacturing of customized premium quality mills and installations.

YOUR NEED, OUR SOLUTIONS:

At Frewitt, we aim to fulfill our client's needs and exceed their expectations, which is why we offer turnkey installation solutions: integrating each category of our machines that are adapted to your environment, whilst still respecting the principles of product and operator protection. Applying our state-of-the-art technology, we can combine and assemble different modules and various components into a unique installation, meeting your requirements. Frewitt Total Care is a complete package; from URS to conception to delivery to After Sales Service, we deal with the client directly at each stage of the project and beyond.

WHY CHOOSE FREWITT:

What sets us apart from our competitors is our ability to assess a client's requirements and, utilizing our wealth of experience in this field. We provide a unique package adapted to factors such as the customers sizing needs, and product and work constraints. That's why our turnkey solutions are so successful. Our advances in technological solutions and processes, combined with our innovative approach to module assembly enable the flexibility to offer complete solutions with ease and within acceptable time frames. From cryo to containment to particle size reduction, Frewitt offers a wide variety of unique, high-performance, customized installations.

INSTALLATION PACKAGES

Our installations can include any of the following options while maintaining performance and high-quality:

- Up to OEB 5 Installation with SMEPAC certification
- WIP and CIP options
- SIP with Sterility Assurance and PED 2014/68/EU certification
- ATEX: Inside 1GD / Outside 2GD
- Inside: Complete N2 and O2 control
- Exhaust filter system ProFi-Clean
- Second safety filter
- Crusher
- All milling possibilities
- Conveying system with N2 station
- Product sampler
- Dosing device
- Liner system
- Welding tong
- High scale dosing precision
- Active grounding system
- Automatization (Siemens, Allen Bradley, CFR 21 Part 11)

YOUR CHALLENGE, OUR SOLUTION

We have a dedicated team of engineers at your disposal to assist and advise on your customized installation. From your initial ideas and requirements, we can propose a solution that will smoothly transition into your work environment and improve your results.
